

I have listened to Air1 on 98.7 for the last two + years. It serves the local community with listener friendly programming with a positive message. I even received a personal call from the station just last night asking if they were any concerns I had that the staff could be praying about. It was refreshing to get a call that was not asking for money or trying to get you to buy something. If Air1 were taken off the air it would leave a large gap in this kind of programming since there are only two other stations like this in the valley (both local). I believe that the service provided by Air1 to this community is priceless and if taken off the air it would be hard to find a station that would offer this type of programming. I would like to know the reasoning behind even considering this action. There are other stations in the Treasure Valley that make use of these translators and have for many years. They add diversity to the programming usually found on the FM dial and I am sure have had a positive impact on the listeners.

Thank you for your thoughtful consideration in this matter.
